

Estimate State Aid Fall Enrollment

Fall enrollment is defined by legislation (SB157) as the number of KG-12 grade students enrolled in all schools operated by the school district on the last Friday in September of the previous school year minus the number of students for whom the district receives tuition, except nonresident students who are in the care and custody of a state agency and are attending a public school and students for whom tuition is being paid pursuant to SDCL 13-28-41.2, plus the number of students for whom the district pays tuition. When computing state aid to education for a school district under the foundation program pursuant to SDCL 13-13-73, the secretary of the Department of Education shall use either the school district fall enrollment or the average of the school district's fall enrollment and the school district's fall enrollment from the prior year, whichever is higher.
